Design - Construction

Fackler Construction

- ❖ 18 years+

Areas of desired interest/study, skill and experience:

- Experience with design software, such as AutoCAD or SketchUp
- Strong understanding of construction design principles
- Communication skills, teamwork

Fackler construction is seeking a talented design student to assist our sales and design team. The ideal candidate will have experience using design software, such as AutoCAD or SketchUp, and have a strong understanding of construction design principles. They will be responsible for creating and revising construction plans, working with clients to understand their design needs, and collaborating with the sales and design team to ensure that projects are completed on time and within budget. This is an excellent opportunity for a student who is looking to gain hands-on experience in the construction industry and build their portfolio.

Engineering - Civil/Water Field

McMinnville Water & Light

- ❖ Valid Oregon Driver's License
- ❖ Currently enrolled in a college technical program and has completed at least 2 years of coursework by Summer 2023.

Areas of desired interest/study, skill and experience:

- General engineering principles knowledge, skilled with computers, exposure to AutoCAD or similar software
- Excellent communication skills, performs safe work practices, team player, prompt, independent worker, works well with various departments and the public

This intern will assist engineering and operations staff with: engineering analysis, basic engineering calculations for water facilities, support engineering projects with office and in field tasks. Prepare and maintain a variety of office and engineering records, reports, maps and drawings. Ability to work in all weather conditions and sufficient mobility to cover uneven terrain. This employee upon acceptance will complete a MW&L employment application and will be required to pass a drug test and a physical capacity test.

Engineering - Civil

City of McMinnville Engineering Department

- ❖ Valid Oregon Driver's License

Areas of desired interest/study, skill and experience:

- General engineering principles, knowledge of computer software and drafting design tools, survey principles, map and GIS awareness, math skills through trigonometry, clear and concise reporting techniques, knowledge of public works infrastructures
- team player, creative, mathematics prone, concise data gathering, good communication and reporting skills, ability to work indoors and outdoors in all types of weather

The person in this position will assist in a wide variety of civil engineering projects related to transportation and wastewater systems; project inspection and management; and public infrastructure asset management, mapping, and GIS. This position will perform entry-level technical engineering work, and will have an opportunity to learn information gathering and asset condition assessment techniques using GPS data collectors in the field and working with the City GIS system; will assist with City capital improvement projects and develop skills interpreting project construction plans, asbuilts and other engineering products; and will assist on other Engineering and Community Development projects as needed. This position will participate in the design of a variety of engineering projects and performs a variety of drafting assignments using manual and computerized methods; creates and updates drawings, maps, graphs, and charts for engineering use; and, provides data to the City's GIS Specialist. The Intern will work as part of a team at times, with other City staff, and individually at other times.

Engineering - Data Analysis

Parker Meggitt

- ❖ Valid Oregon Driver's License
- ❖ Must be +18 and eligible to work in the US (must be US citizen or Permanent Resident)

Areas of desired interest/study, skill and experience:

- Engineering
- Data Analytics
- Organized
- Self-Starter

This role will focus on data collection and analysis. Working closely with our Customers, we deliver technologically differentiated systems and products with high certification requirements in aerospace, defense and selected energy markets.

Engineering - Drafting

Solid Form Fabrication

- ❖ Must be +18

Areas of desired interest/study, skill and experience:

- Engineering
- Drafting
- Solidworks
- CAD

The McMinnville Works Engineering Intern will work with Engineering Department leaders to gain an understanding of the fundamental Solid Form engineering processes and participate in engineering related projects. As a Solid Form team member, this position shares and demonstrates our mission and values through workmanship and interactions with internal and external audiences.

Engineering - Electrical

McMinnville Water & Light

- ❖ Valid Oregon Driver's License
- ❖ Currently enrolled in a 2 or 4 year college technical program (e.g. engineering, drafting, science, or math) having completed at least 24 credit hours. Experience or training in using technical drawings (either civil, electrical, mechanical or structural).

Areas of desired interest/study, skill and experience:

- Works closely with the Senior Electrical Engineer with system design including substation construction and retrofits and transmission and distribution system improvements.
- Performs skilled drafting of preliminary and final construction drawings and specifications, maps, schematics, diagrams, as-builts, forms, etc. from verbal instructions and/or preliminary sketches in electrical, civil, and architectural engineering fields.
- Field verifies drawings for electric or water personnel.
- Maintains the network archive and physical archive of facility, equipment, schematic, and construction drawings.
- Develops and maintains new and existing drafting standards.
- Organizes work to be accomplished in a safe and efficient manner.
- Performs related work as assigned.

This is engineering and drafting work in the Engineering Department of McMinnville Water and Light (MW&L). The Electrical Engineering Intern is responsible for assisting with project design and

documentation, and maintaining system drawings. The Intern is expected to accomplish this through use of AutoCAD, manual drafting, organization skills, and Microsoft Office software.

Event Planning

Wagner Advisory Group LLC

- ❖ Valid Driver's License and ability to drive

Areas of desired interest/study, skill and experience:

- Strong organizational and time management skills
- Excellent written and verbal communication skills
- Ability to work independently and in a team environment.
- Assist with marketing efforts including social media and email campaigns.
- Help manage event timelines and ensure deadlines are met.
- Professional and positive attitude with excellent interpersonal skills
- Proficiency with Microsoft Office and Google Suite
- Strong interest in event planning and execution
- Passion for technology and innovation

This role will assist with coordinating vendor and sponsor logistics, including communication and delivery of sponsor benefits. Work with speakers to ensure timely delivery of presentation materials and schedule coordination. Assist with marketing efforts, including social media and email campaigns. Help manage event timelines and ensure deadlines are met. Attend planning meetings with the Director of Conference Development and provide input and assistance on all aspects of event planning. We are a team of experienced professionals who provide technology advisory services and digital transformation solutions to businesses. Our focus is on digital transformation and cybersecurity which makes us the ideal partner for businesses looking to grow and compete in today's digital economy.

Farm Hand / Research Assistant - Microbiology

Chapul Farms

- ❖ Ability to lift and move 40 lb trays/bags short distances

Areas of desired interest/study, skill and experience:

- Basic Mathematics,
- Proficient in Microsoft Excel/Word
- Data oriented,
- Mechanically inclined,
- Farm experience

- Agriculture, Animal Nutrition, Soil Health, Gut Health, Sustainability, Closed loop production systems

Chapul Farms uses black soldier fly larvae (BSFL) microbiology to close agricultural production loops. The insects consume and upcycle nutrients previously destined for landfills, restoring biodiversity to soils and gut microbiomes. This position would help us run feedstock trials (using insects to break down various types of agricultural waste) at our McMinnville research facility. The person would help us operate and maintain lab/farm equipment and capture data and lessons learned. We would then apply the learning from the research center to larger scale production facilities all throughout the US.

Lab Assistant

Precision Analytical/ Dutch Test

- ❖ 18 years+

Areas of desired interest/study, skill and experience:

- Accuracy, High level of attention to detail
- Computer technology experience
- Organized
- Chemistry
- Data Entry
- Lab Tech
- Confidentiality
- Preparation of samples
- Patient Sampling

This role will support various daily needs of the lab in preparing patient samples for testing. Precision Analytical is a CLIA certified laboratory dedicated to helping patients and their healthcare providers find answers to complex clinical questions. Our unique hormone testing and reporting methods create better tools for healthcare providers to explore hormone issues with their patients.

Marketing

SwedeMom Center of Giving / MacHub

Areas of desired interest/study, skill and experience:

- Familiarity with MS Office, Google docs., social media platforms.
 - Photography skills and product shots a plus
 - Community engagement and relations
 - Self-Starter, Organized, team player
 - innovative and creative
-

- reliable and consistent

This intern will assist in areas such as social media graphic design, web design, copywriting and SEO. Photography skills are a plus. Swedemom Center of Giving is passionate about making a difference in the financial stability of charitable organizations.

Marketing: Social Media

Fackler Construction

- ❖ 18 years+

Areas of desired interest/study, skill and experience:

- Creativity
- Strong knowledge of social media platforms
- Website management (WordPress)

Fackler Construction is seeking a creative and motivated student intern to help with our social media and marketing efforts. The ideal candidate will have a strong understanding of various social media platforms, and have experience creating engaging content. The social media and marketing intern will be responsible for managing the company's social media accounts, creating and executing marketing campaigns and helping to increase brand awareness. They will be responsible for updating website content through WordPress. This is a fantastic opportunity for a student who is interested in pursuing a career in marketing and wants to gain valuable experience in the field.

Merchandising / Sales

SwedeMom Center of Giving / MacHub

Areas of desired interest/study, skill and experience:

- Familiarity with Retail Apps., MS Office, Google Docs.
- Photography skills and merchandise staging for photo shoots
- Self-Starter, Organized, team player
- innovative and creative
- reliable and consistent

This intern should be able to recognize high value brands, understand resale value of products, present items in an appealing way and support increased sales. Swedemom Center of Giving is passionate about making a difference in the financial stability of charitable organizations.

Product Tester/ Quality Assurance

[Tanoshi](#), Inc.

Areas of desired interest/study, skill and experience:

- Product testing and reporting
- Product development / junior product manager
- Market research and analysis, online and in-store research, and create reports.
- Website development: help make improvements to our [Tanoshi.com](#) website.

Internship opportunity for hands-on work experience in developing new consumer electronics products. Testing apps and making reports on what needs fixing. Work with senior engineers to make improvements so the product is ready to launch. Great opportunity for future product managers.
